VISIONBOX is the tipping box system that will allow you to store the items you need in a simple and orderly way.

Combinable and stackable modules to organize from small assemblies to large structures.

Cleanliness and hygiene in storage applications.

Each box is divided into compartments with independent boxes, tiltable up to 45° and removable, thus facilitating easy access to its interior.

The transparent boxes allow the quick visualization of its content while the label holder provides more detailed information (labels included).

Anti-Shock Polystyrene in color beige makes it resistant to impacts.
